About Me

Former managers describe me as a **proactive, autonomous, and critical-thinking** developer with strong communication skills and the ability to bring positive energy into any team.

I thrive in environments where I can contribute ideas, challenge assumptions, and help build clean, scalable, and impactful digital products. I'm especially motivated by software architecture, AI-powered applications, and improving team productivity through better tools and processes.

Experience

Fantasticfy

April 2025 - Present

Full Stack Developer

Barcelona

- Introduced **Hexagonal Architecture**, improving scalability, maintainability, and team collaboration.
- Increased team productivity by leading the adoption of **Cursor** (AI-based IDE) and training the team on best practices.
- Delivered multiple end-to-end **Shopify apps**, from planning to **CI/CD** in Shopify & Azure using Docker.
- Built reusable internal modules using **OOP** and consistent design patterns.
- Delivered tailored merchant experiences by customizing **Liquid, Polaris, and React** components.
- Acted as a bridge between design, PMs, and clients to ensure alignment between technical execution and business goals.

Credible

December 2024 - Present

Co-founder & Full Stack Developer

Barcelona

- Co-built a **SaaS platform powered by AI**, focused on generating dynamic professional profiles.
- Designed the **frontend architecture** using React + TypeScript with scalability in mind.
- Worked closely with a Python backend to integrate AI models and ensure a smooth user experience.
- Selected by **EWOR**, a top European entrepreneurship accelerator for high-potential founders.
- Delivered a lean **MVP** quickly in a remote, agile environment.

IMPAKTER

September 2024 - February 2025

Full Stack Developer

London (Remote)

- Built a **sustainability platform** aggregating data for **3,000+ companies**, improving research accessibility.
- Created a **comparison engine** for users to analyze companies based on key sustainability metrics.
- Automated spreadsheet-to-database **data migration**, reducing manual processes and errors.
- Optimized tech infrastructure to ensure **scalability** and fast data processing.
- Created a responsive static site for the main product, improving visibility and engagement.
- Implemented Figma designs with pixel-perfect precision and accessibility best practices.

Education

UNIR - Universidad Internacional de La Rioja

September 2024 - July 2025

Full Stack Development

Master's Degree

✉️ <https://www.unir.net/>

- Master's Degree in Full Stack Development, integrating HTML, Tailwind, Bootstrap, **Angular 19**, MySQL, MongoDB, Git, **TypeScript**, Express and testing.

Self-taught Learning

August 2022 - Present

Full Stack Developer

- After completing two university degrees, a master's degree, and multiple training programs, I've developed a **personal learning method** that I've refined over time and that I know works exceptionally well for me.

- I discovered that learning becomes more enjoyable and sustainable when I enjoy the process. That motivation has been key to maintaining **discipline** and advancing consistently even in completely new areas.

- In addition to studying on my own, I've relied on **mentors** who were already where I wanted to be. Their perspectives have allowed me to accelerate my growth, avoid common mistakes, and make smarter decisions.

- This hybrid approach of self-discipline, curiosity, structure, and expert guidance has become one of my greatest differentiators as a professional.

Skills

Frontend

React, Next.js, TypeScript, JavaScript, TailwindCSS, CSS, HTML

Backend

Node.js, Express, REST APIs, GraphQL, OOP, Hexagonal

DevOps

Docker, CI/CD (Shopify, Azure), Git, Testing

Databases

PostgreSQL, MongoDB, MySQL, SQLite

Others

Shopify (Liquid, Polaris), Agile/Scrum, Pair Programming, Technical Documentation

Languages

Spanish

Native

Catalan

Native

English

Advanced

Other Education & Certifications

Bachelor's in Physiotherapy

September 2017 - June 2022

Pompeu Fabra University

Bachelor's in Physical Activity & Sports Sciences

September 2017 - June 2022

Pompeu Fabra University

React, Hooks, Context, Redux, MERN

April 2024

Udemy

Google Cybersecurity Professional Certificate

January 2024

Coursera

Modern React with Redux

September 2023

Udemy

What I'm Looking For

I'm looking to join a product-driven team where I can:

- Work on scalable architectures and modern full-stack development
- Contribute to building AI-powered features and platforms
- Collaborate with teams that value clean code, autonomy, and continuous improvement
- Take responsibility and ownership of technical decisions
- Grow toward a role that combines development, architecture, and team leadership
